25 October 1965

**SUPERNOVA IN ANONYMOUS GALAXY**

$2^{\text{h}}20^{\text{m}}.8$	$+30^{\circ}50'$	1855.0
2 23.4	+31 2	1900.0

The Supernova 16<sup>m</sup>, announced in IAU Circ. 1931, is visible on 11 astrograph plates 1965 Sep. 20/21 to Sep. 25/26. No immediately preceding plates are available. On the first 2 days the star is slightly brighter than the nucleus of the galaxy, on Sep. 25/26 equal to the nucleus. The galaxy, according to Palomar Sky Survey, might be a face-on spiral system. The supernova is preceding the nucleus 0'.45, slightly to the south.

**OBJECT ROSINO-ZWICKY NEAR M88**

A mistake in reducing the estimates of this object has led to wrong 1965 magnitude data given in this Bulletin, No. 99.

Including several estimates on Sky patrol plates (Te, taken by H. Huth) the following correct magnitudes can be derived from Sonneberg plates:

Plate	Date (UT)	Magn.	Remarks
GC 142	1961 Dec. 3.1	14.6	
Te <sub>2</sub> 2591		13.5	
Te <sub>2</sub> 2596/7	17.1	13	2 plates
GC 153	17.2	15.0	
Te <sub>2</sub> 2601	18.2	13	
Te <sub>2</sub> 2603	19.2	13	
GC 1337	1965 March 8.1	17	
Te <sub>3</sub> 4487	11.1	14	
Te <sub>3</sub> 4505/6	29.9	13.35	2 plates
Te <sub>3</sub> 4518	Apr. 1.0	13.5	
Te <sub>3</sub> 4525	2.0	13.8	
GC 1352	2.0	13.8	
Te <sub>3</sub> 4537/8	3.0	13.7	
GC 1356	3.0	13.8	
Te <sub>3</sub> 4547/8	3.9	13.7	2 plates
GC 1362	5.9	13.8	
Te <sub>3</sub> 4558/9	6.0	14.05	2 plates
GC 1365	27.9	15.4	
GC 1370	May 20.9	17
