MINIMA OF ECLIPSING VARIABLES

The list below contains 28 heliocentric minima observed visually by one of the writers (M.Winiarski) at the Astronomical Observatory Fort Skala in the years 1964-1967. The times of minima and the so-called "limits of error" were obtained by the tracing-paper method. The O-C values were computed from the linear elements given in the General Catalogue of Variable Stars, 3rd ed., Moscow, 1969; "n" denotes the number of observations used in the determination of minimum.

	J.D. hel.	limits of error	period of observations	O-C	n
RT And	2439054.481	±.004	1965,Oct. 2 - Oct. 27	+0.006	11
