ECLIPSE TIMINGS OF CATACLYSMIC VARIABLES

The following heliocentric times of eclipse of the cataclysmic variable U Gem have been obtained from photoelectric observations made in blue light with the No. 2, 91-cm telescope at Kitt Peak National Observatory.

HJD	(O-C)	(O-C)	Eclipse Depth (mag)	Eclipse Width (day)
2443192.7960	+0.0079	-0.0007	0.70	0.0143
2443193.6806	+0.0080	-0.0006	0.65	0.0137
2443195.8038	+0.0083	-0.0003	0.71	0.0134

Residuals in the second column are based on light elements given by Krzeminski (Ap. J. 142, 1051, 1965), while those in the third are based on the quadratic solution given by Arnold, Berg, and Duthie (Ap. J. 206, 790, 1976).
