LIEGE SYMPOSIUM No.23

As it was announced in "a peculiar newsletter" No.5, the 23rd Liège International Astrophysical Symposium will be devoted to α^2 CVn-type variables (Ap stars) and related stars (He variables, Am stars, etc.).

It is meeting with a big success. The attendance which was initially planned to be limited to a hundred participants, will largely exceed this number in fact. The contributed papers being also very numerous the Colloquium previously fixed from 23 to 25 June 1981 will be extended by one additional day, through Friday 26.
